About me

Computer Science student at the University of Leicester with experience developing full-stack applications using Python, C#, SQL, HTML, CSS and JavaScript. Interested in software engineering and full-stack development, with practical experience building web applications and database-driven projects. Seeking a 2027 software engineering placement to apply and develop my technical skills in a professional environment. Currently Working Towards 2.1.

Projects

Cricket Game & Player Management System

C# | Unity | SQLite | SQL

- Developed an interactive 3D cricket game in Unity using C#, implementing gameplay mechanics including ball physics and scoring.
- Built a SQLite-backed player management system supporting user registration/login, persistent scores, match history and a Top 10 leaderboard using SQL queries.
- Implemented session management and a points system to associate gameplay data with individual users and persist player rewards.

SortStudents — Collaborative Student Household Task Manager

Python | Django | SQLite | HTML/CSS | JavaScript | Bootstrap | HTMX

- Collaborated as one of five developers to build a Django web application helping students in shared accommodation organise and assign household tasks.
- Developed database-backed functionality for households, student profiles, task assignment, due dates and completion tracking using Django and SQLite.
- Implemented session-based authentication and personalised task views based on the logged-in student and household.
- Used HTMX to asynchronously update task completion status without requiring a full page reload.

MusicFest 2025 — University Web Development Project

HTML | CSS | JavaScript

- Designed and developed a responsive multi-page music festival website featuring event information, artist line-up, schedules and ticket booking.
- Implemented JavaScript functionality including schedule filtering, dark/light mode persistence and client-side form validation.
- Used CSS Flexbox, Grid and media queries to create responsive layouts across different screen sizes.

Experience

Senior Team Member — Dough What

Leicester, UK | November 2025 – Present

- Take responsibility for day-to-day operations during busy periods, prioritising tasks and ensuring work is completed efficiently.
- Support and guide team members, helping maintain a productive and organised working environment.
- Communicate effectively with customers and colleagues to resolve issues and maintain a high standard of service.
- Work effectively under pressure while managing multiple tasks within strict time constraints.
- Demonstrate reliability and adaptability by taking on additional responsibilities when required.
- Developed strong teamwork, communication, problem-solving and time-management skills in a fast-paced environment.

PEER MENTOR — UNIVERSITY OF LEICESTER

2026–Present | Leicester, UK

- Selected and trained as a Peer Mentor to support new students as they transition into university life.
- Will provide regular one-to-one support, checking in with mentees approximately every two weeks throughout the academic year.
- Help students settle into university, access available support and feel comfortable within the university community.
- Developed communication, active listening and interpersonal skills through mentor training and preparation.

Education

University of Leicester — BSc

Computer Science

2025–2029

Expected graduation: 2029

Placement year: 2027–2028

Relevant Modules-Introduction to OOP, Algorithms, Engineering and Professional Practice, Foundation of Computation

Wyggeston and Queen Elizabeth I College (WQE) – A levels

Maths(D), Computer Science(C), Electronics(C)

Skills

Programming Languages:

Python, C#, JavaScript, SQL

Frontend: HTML, CSS, Bootstrap, HTMX

Backend: Django,

Databases: MySQL, SQLite

Tools & Technologies: Git, GitHub, Unity, VS Code
